*Re: Approval of Sign Location
Registration No. 15270
US-75, Okmulgee County
Latitude: 35.68794312, Longitude: -95.97210299*

Dear Sign Owner:

In accordance with Title 69 O.S. 2011 ' 1271 et.seq. and the Oklahoma Administrative Code Title 730, the Oklahoma Department of Transportation has approved the enclosed application for registration and permitting. We have also enclosed the registration certificate, permit and tag. Please be sure to attach the tag to the sign structure where it will be visible from the highway, at approximately eye level, within sixty (60) days of receiving this approval. If the sign has not been constructed by that time, please be sure to place a permanent marker, with the correct tag attached, at the approved site.

You indicated on the application that you intend to install LED type display on a stacked sign structure. Be aware that only one LED panel is allowed per facing. The use of LED technology is sanctioned under the Tri-Vision sign regulations. Although your structure will not be using rotating slats as are used with Tri-Vision signs there are still certain guidelines that coincide with these two types of technology. State and federal laws prohibit moving, flashing or intermittent lights being used on off-premise commercial advertisement, the transformation from one display to the next, will need to occur with static displays, without any type of obvious animation such as fading or scrolling. Each individual display will need to remain in place no less than 8 seconds. You will also need to be cognizant of the brilliance of the lighting so that your signs do not pose a safety risk to the travelling public. Be sure to remain within these guidelines to ensure the compliance of your signs. The regulations pertaining to illumination of signs can be found in the Oklahoma Administrative Code, Title 730:35-5-12 (c). Also, when building stacked units, please be sure no to exceed the maximum facing height of 25 ft. Keep in mind a vinyl covering placed over both panels could cause the overall facing height to exceed 25 ft. allowance and therefore cause the sign to be deemed illegal.

Be advised that the issuance of this permit shall not be construed to supersede or override any ordinance, act or rule of a city, town, county, zoning authority or other duly constituted regulatory body, which may forbid or otherwise restrict the sign, the signal structure, any messages displayed, or any other incident of control of the sign or its uses.

If you have any questions or need additional information, please do not hesitate to call the Outdoor Advertising Control office. (405)521-3005

Respectfully,

Barbara Hoppes
